

SHAJAR ABBAS

Full Stack Developer | MERN Stack | Next.js | Node.js

Phone: +92-314-6890954 | Email: shjmehar400@gmail.com | LinkedIn: linkedin.com/in/shajar-abbas-developer | Location: Sheikhpura, Punjab, Pakistan

Professional Summary

Full Stack Developer with 2 years of professional experience building and deploying production-grade web applications using the MERN stack (MongoDB, Express.js, React.js, Node.js), Next.js, and NestJS. Proven ability to deliver end-to-end features across the full development lifecycle — from REST API design and database architecture to responsive frontend development with React.js, TypeScript, and Tailwind CSS. Hands-on experience with real-time WebSocket systems, payment gateway integration (Stripe), role-based authentication, and containerization using Docker. Comfortable contributing to team codebases, participating in code reviews, and shipping production features on schedule.

Technical Skills

Languages: JavaScript (ES6+), TypeScript, Python
Frontend: React.js, Next.js, Tailwind CSS, HTML5, CSS3, Responsive Design
Backend: Node.js, Express.js, NestJS, REST API Design, WebSockets, JWT Authentication
Databases: MongoDB, PostgreSQL, MySQL, Mongoose, Database Schema Design
Tools & DevOps: Docker, Git, GitHub, npm, Postman, VS Code
Payments & Integrations: Stripe, Binance WebSocket API, Bybit API
Methodologies: Agile, REST Architecture, MVC Pattern, Role-Based Access Control (RBAC)

Work Experience

Software Engineer July 2025 – April 2026
DEVFIED Johar Town J2 Block, Lahore, Pakistan

- Led frontend and backend development of **Copyyt**, a real-time Binance and Bybit copy trading platform that automatically mirrors trades opened by community leaders across all subscribed members simultaneously
- Built responsive community dashboards, subscription management flows, and live trade status tracking interfaces using **React.js**, **TypeScript**, and **Tailwind CSS**
- Developed backend trade synchronization logic using **Node.js** and **WebSocket** event streaming, ensuring trades opened and closed in real time across all active subscriber accounts
- Collaborated with the product team in an Agile environment to define feature requirements, conduct code reviews, and deliver production-ready releases on schedule

Associate Software Engineer July 2024 – June 2025
PIECYFER Johar Town, Lahore, Pakistan

- Contributed to **Effapy**, a three-sided SaaS platform connecting students, universities, and employers to manage and fund student course fee workflows, built with **React.js**, **Node.js**, **Express.js**, and **MongoDB**
- Developed employer-facing dashboards and university admin portals featuring role-based access control (RBAC), fee request workflows, and multi-role user management
- Built a **Binance demo trading system** that consumed live WebSocket price streams from Binance exchange and executed automated trades using configurable limit-order logic

Projects

SM Store — Full Stack eCommerce Application — Modern eCommerce platform featuring product filtering, cart system, Stripe payment checkout, order management system, and admin panel for inventory control

Tech Stack: React.js, Node.js, Express.js, MongoDB, Stripe, REST API, JWT Authentication
<https://ecommerce-backend-6irl.onrender.com>

Foodie — Restaurant Management System — Full-stack restaurant management system with menu management, cart functionality, Stripe payment processing, admin dashboard, and real-time order tracking features

Tech Stack: React.js, Node.js, Express.js, MongoDB, Stripe, WebSockets, REST API
<https://foodproject-xvx7.onrender.com>

Copyyt — Crypto Copy Trading Platform — Production copy trading platform where leader trades on Binance and Bybit are automatically mirrored in real time across subscribed members using WebSocket event streaming

Tech Stack: Next.js, NestJS, Tailwind CSS, WebSockets, PostgreSQL, Binance API, Bybit API

Effapy — EdTech Fee Management Platform — Three-party SaaS platform managing student course fee funding between students, universities, and employer sponsors with role-based dashboards and approval workflows

Tech Stack: Next.js, TypeScript, PostgreSQL, NestJS, REST API, Role-Based Access Control

Education

Bachelor of Science in Computer Science (BS CS)
Government College University (GC University), Lahore, Pakistan
